

# MARINE MOUNTS (ANTI-VIBRATION MOUNTS)

VIBRATION CONTROL PRODUCTS

Marine Mounts, or anti-vibration mounts, are universal mounting and popular in a wide range of marine applications and industries. Marine mounts are cost-effective, high-performing, and easy to install. The rubber is used in shear compression providing optimum performance and a wide range of flexibility. Offering vibration reduction up to 95%.

- ✓ The metal top cover provides protection from contamination, such as oil and fuel.
- ✓ Marine mounts are designed with an integral mechanism to stop and control the movement of the mounted equipment.
- ✓ These mounts are easy to install, allowing for quicker installs and manufacturing time.
- ✓ Their fail-safe design makes them perfect for mobile applications where space constraints are typical and are ideal for both mobile and static applications.
